Knowledge Mobilization Strategies

Bringing people in

- Organizing public events
- Creating connections with current and former public servants

Getting the message out

- Working with community groups and governments
- Writing for popular outlets

Nuclear Insights

Creating relationships with policy makers and the public

Nuclear Insights: New Research, New Opportunities

There are many new and interesting nuclear research studies taking place in Saskatchewan. Nuclear researchers and scientists in the province are currently undertaking research in engineering and physics, health and medicine, and social science. How do these research findings impact the lives of the people in our province? This is exactly what Nuclear Insights 2018 is all about!

Good nuclear policy should combine research, innovation and public engagement

February 20, 2019 7:12pm EST

Public policy and community engagement should inform nuclear research. Shutterstock

As a public policy researcher, I've thought a lot about how governments can improve the lives of citizens and achieve their social, environmental and economic goals. Sometimes policy is a reaction to urgent demands from the public. Other times it emerges as a response to new research. Ideally, good public policy takes into account citizens' values and
