Content

1. General context
2. Reporting sustainability
3. Benchmaring

General Context

- Launched in **2010** by Universitas Indonesia

- **Online survey** regarding current condition and policies related to Green Campus and Sustainability in the Universities all over the world

- **Main areas**: Global climate change, energy and water conservation, waste recycling, and green transportation

- Criteria include **baseline information** as the size of the university, both spatially and in terms of population, the campus location and the amount of green space; and also information on energy use, transport, water use and recycling and waste treatment

33 Indicators

Variables

- Energy and Climate Change (EC) (21%)
- Waste (WS) (18%)
- Transportation (TR) (18%)
- Education and Research (ED) (18%)
- Setting and Infrastructure (SI) (15%)
- Water (WR) (10%)

# 719 Universities from 81 countries in 2018

In Colombia

- Two members of the steering committee
- 39 universities (country with more participants)

Total score

Water

Last but not least

To be considered
• **Size** of the University
• Type of **funds** (public / private)
• Developing a **culture** among stakeholders

Reflections
• Why to be on a ranking?
• Does reporting is corelated with quality of the education?
• How stakeholders participate?
• Are all indicators important for our organizations?

The National Workshop and Technical Workshop on UI GreenMetric World University Rankings hosted by Universidad Nacional de Colombia and Universidad del Rosario, Colombia

5-6 June 2018 | Bogota, Colombia

Benchmarking

- Development of a strengthened network.
- Collaboration strategies between different universities.
- Collaborative work to influence public policies.
- Identification of best practices to be implemented.
- Execution of technical workshops for the improvement of indicators.
